

MCSJ Code Updates: Version 2019.1

It is NOT NECESSARY to Download from Work station prior to installing code at the server.

Access the MCSJ Server and Open the MCSJ Console. Splash screen will appear.

Click on the RED boxes to stop the individual running databases (alternatively, select "Stop all")

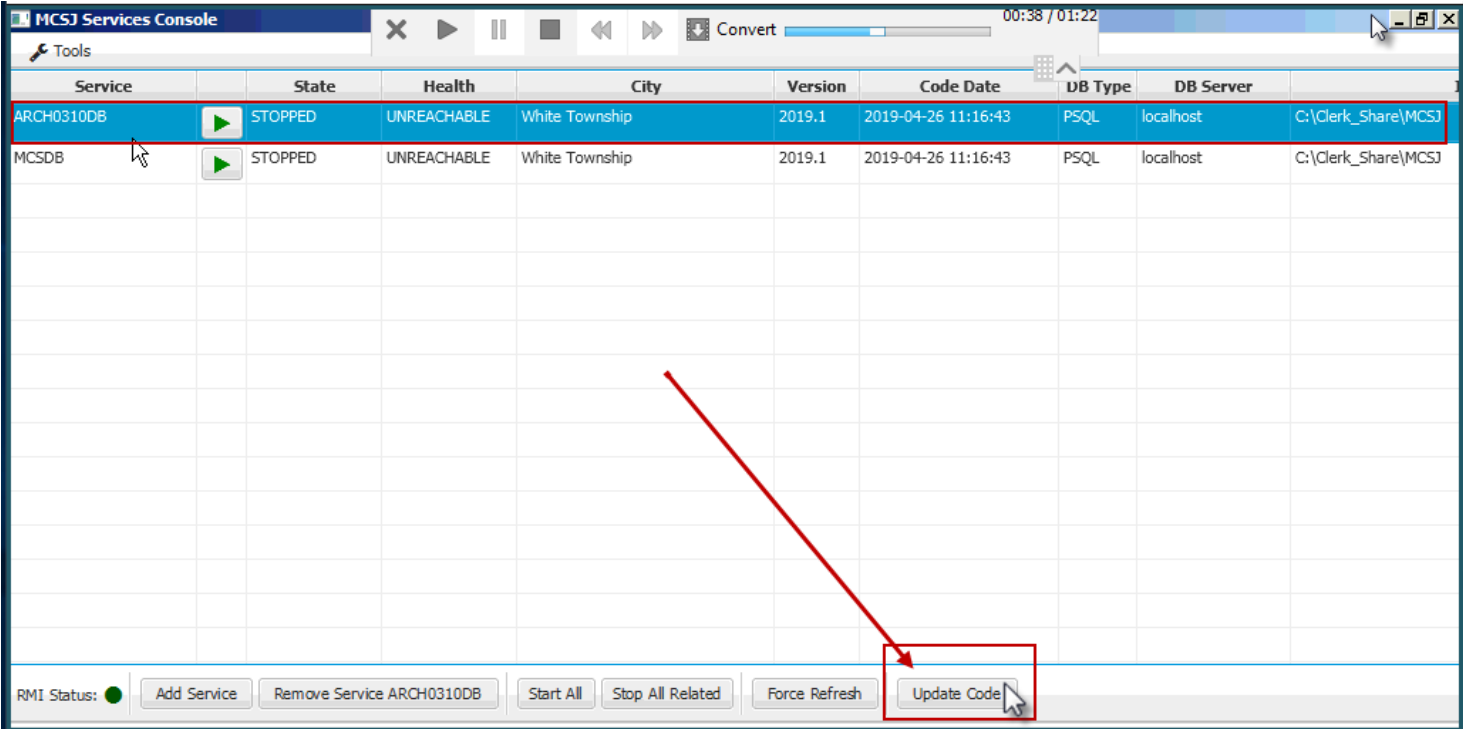

Service	State	Health	City	Version	Code Date	DB Type	DB Server
ARCH0310DB	<input type="checkbox"/> RUNNING	REACHABLE	Township	2019.1	2019-04-26 11:16:43	PSQL	localhost
MCSDB	<input type="checkbox"/> RUNNING	REACHABLE	Township	2019.1	2019-04-26 11:16:43	PSQL	localhost

Tools: Add Service, Remove Service..., Start All, Stop All, Force Refresh, Update Code

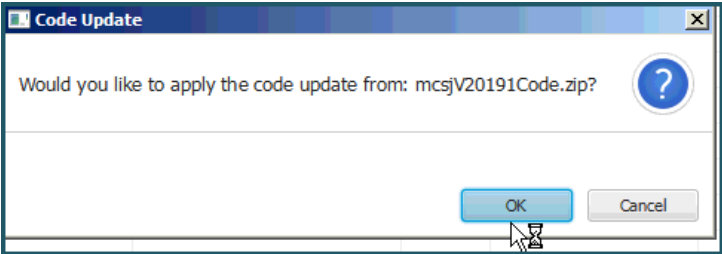

State will now be displayed as "STOPPED."

Service	State	Health
ARCH0310DB	<input type="checkbox"/> STOPPED	UNREACHABLE
MCSDB	<input type="checkbox"/> STOPPED	UNREACHABLE

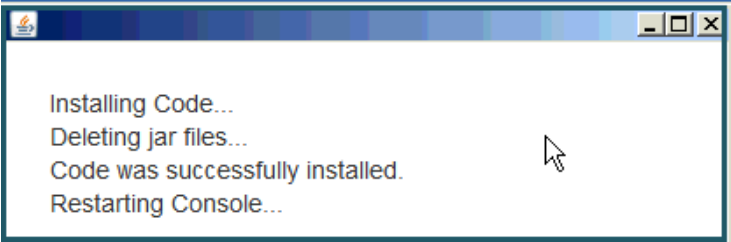

Click on any one of the databases to select. Database will be highlighted.
Click on "Update Code."

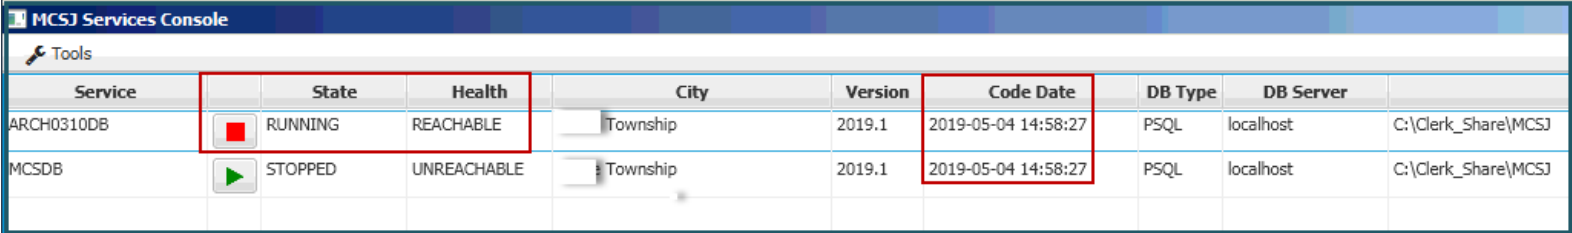

Click "OK" to install code.

MCSJ Console will close, install code and restart.

After a few minutes, the State of all databases will change to "RUNNING" and Health will change to "REACHABLE", indicating that that you can log back into MCSJ.

You can verify the current code date from the "Code Date" column.
