

## Download Code

Go To: *File > Download Code*

**Note: Only users with a System security level within User Maintenance of 4 or greater will have access to this menu option.**

- (1) Click **Next** to begin the download process.
- (2) After the download process is complete, close the window and exit MCSJ.

**Note: All users must fully exit MCSJ before the next step can take place to install code.**

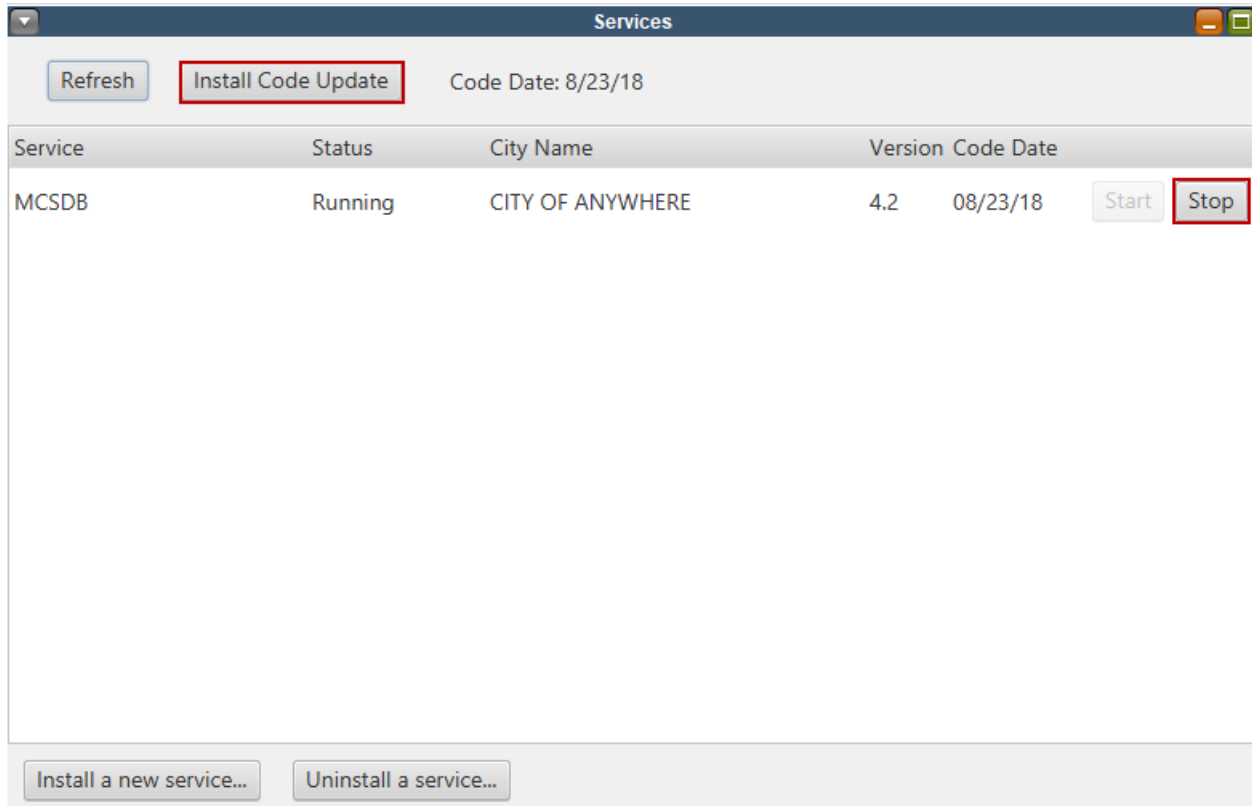

# Updating Code for MCSJ

## Install Code Update

**Note: This step must be completed from your server.**

After logging into the server, locate the MCSJ Console on the taskbar or double-click the icon on the desktop to open it.

- (1) Click **Stop** on any database service that is currently running.
- (2) After all services have been stopped, click **Install Code Update**.
- (3) The MCSJ Console will install the code and automatically restart all database services. Once all services have restarted, users may log back in.

# Updating Code for MCSJ

## Verify the Code Date

Go to: *Help > About MCSJ*

- (1) Log into MCSJ and click on the specified menu option above.
- (2) Check the code date.

**Note: It is highly recommended to update your code at least once a month.**
